Boomerang Medical Names Pharoah Garma Chief Operating Officer

Highly accomplished executive with strong track record of regulatory and R&D leadership joins company in the newly created position of Chief Operating Officer

MOUNTAIN VIEW, Calif.— Boomerang Medical, Inc., a women-led bioelectronic medicine company pioneering neuromodulation therapies for the treatment of autoimmune diseases, today announced Pharoah Garma has been named Chief Operating Officer, effective immediately. Reporting directly to Heather Simonsen, President and Chief Executive Officer of Boomerang, Garma will help lead the Company's growth as it rapidly advances its clinical programs. Prior to her appointment, Garma was the Vice President of Regulatory, Quality, and R&D at PQ Bypass, where she was instrumental in leading the company through rapid clinical and regulatory progress culminating in a successful acquisition in April 2021.

"Pharoah Garma is a talented leader who has been instrumental in the success of countless Class III medical technologies over the past 20 years. The addition of Pharoah to the Boomerang leadership team will accelerate value creation as we move forward with our research for a device-oriented therapy for patients with IBD," said Heather Simonsen, President and CEO of Boomerang Medical.

Pharoah has held leadership roles for both venture-funded medical technology startups and Fortune 500 companies such as Philips and Medtronic. She spent the early part of her career as a Senior Lead Reviewer at the Food and Drug Administration. Her track record of leading high-performing teams to execute speed-to-patient strategies was a key factor in the hiring decision.

"I am proud and honored to be appointed to the role of Chief Operating Officer at Boomerang Medical and look forward to further advancing our mission of developing new treatment options for patients with autoimmune disease," says Pharoah. "I thank Heather and the Board for the opportunity to lead our incredibly driven and talented team."

The company also announces the hiring of two industry veterans into key leadership roles to support Pharoah and the company during the next phase of company growth. Malea D'Amico has accepted the position of Senior Director of Field and Clinical Operations, and Trent Mengel has accepted the role of Senior Director of Therapy Development. "Malea and Trent are proven

experts in the execution of large-scale clinical research and will be integral to the success of the company and the significant milestones we need to achieve,” says Pharoah. “Their leadership and expertise will be vital to the future of Boomerang Medical.”

About Boomerang Medical

Boomerang Medical is a medical technology startup company headquartered on the campus of El Camino Hospital in Mountain View, Calif. and is a Company-In-Residence at Fogarty Innovation. Boomerang is developing a technology to advance the treatment of autoimmune diseases by harnessing the body’s own peripheral wiring in order to manage inflammation and immune response.
